

**A** Patent pending wishbone design reduces the number of frames, intermediate purlins and eliminates support cables.

**B** An assortment of accessories are available for these buildings including: overhead doors, entrances, windows, lighting, ventilation and much more.

**C** The architectural fabric membrane is a durable, high-density polyethylene weave coated to resist moisture, UV exposure and fading.

**D** 15-year warranty on structural steel frame.

**E** Simple and quick installation.

## WISHBONE™ ARCH & GABLE BUILDINGS

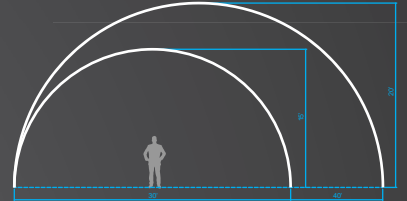

The **KwikBuild by Guard-All** line of Wishbone arch and gable buildings are cost-effective steel framed tension fabric buildings manufactured either as standard rated structures or engineered to specification. KwikBuild buildings are designed for simple, rapid installation by a minimal crew without requiring heavy equipment. The rapid installation of these buildings allows owners to quickly deploy structures for temporary or permanent functions. The KwikBuild selection of buildings feature patent pending Wishbone single tube framing, high-density polyethylene one-piece covers, flexible foundation options, and are available in a selection of profiles. The enhanced stability Wishbone buildings are forged from inline galvanized carbon steel tubing. Gable building profiles are available in 25' (7.6 m) and 30' (9.1 m) widths featuring high sidewall clearance, while arch profiles are available in 30' (9.1 m) and 40' (12.1 m) widths offering large overall volume and inside height clearance. The continuous segmented design allows the building to achieve any length desired.

**Arch Building Widths:** 30' (9.1 m), 40' (12.1 m)

**Gable Building Widths:** 25' (7.6 m), 30' (9.1 m)
